About ICICC - 2019

The International Conference on Intelligent and Cloud Computing (ICICC-2019) aims at the crossroads between scientists, researchers, practitioners and students from diverse domains in cloud computing research. The conference aims at attracting contributions of system and network design that can support existing and future applications and services. In recent years, intelligent and cloud computing attracted significant attention both in research and industry. This approach corresponds to natural human vision and is the best way to represent, generate and implement various contemporary achievements. The International Conference on Intelligent and Cloud Computing (ICICC-2019) will provide a forum that will bring together researchers, academia and practitioners from industry to meet and exchange their ideas and recent research achievements in all aspects of Intelligent and Cloud Computing, together with their applications in the contemporary world.
